how to become  
Blu Guard Certified

## Blu Guard™ Maintenance Plan

# Blu Guard Makes the Difference

## What We Provide

- Annual Tank Cleaning
- Treat with Bio Guard, ULS Micro Biocide, Tank Dri for water removal
- Use Fuel Detection Kit
- Bottom sample product from tank on quarterly basis
- Maintenance - includes inspection and replacement of nozzles if needed, hoses, filters (4 times per year) Inspect decals, gauges, as needed
- Provide quarterly/annual detailed report for customer of inspection cleaning and equipment repair
- Each quarter, check for water

## Benefits of Blu Guard

- Peace of mind knowing that your machines will function better
- Safe for all fuels, gasoline, diesel and ethanol blends
- Consistent treatment will prevent corrosion, while removing water and other contaminants from your fuel tanks
- Cleaning prevents excessive filter clogging and potential engine damage from contaminants
- Better operating machinery, more horsepower, better mileage, less costly repairs
- No fuel loss
